

FALL · 1939

PITZONKA'S Giant-Flowering Mixture of PANSY PLANTS

IT WOULD be interesting to know how many Pansy plants have been thrown away in the nearly half a century we have been rogueing this mixture!

New blood is added from time to time, whenever we are able to find a superior newcomer which will fit in with our fifty-year-old ideal, and ruthless destruction greets every plant which fails to measure up to the requirements.

The result is a well-balanced mixture producing strong, healthy plants which furnish more than a reasonable quantity of giant flowers in a color-range from delicate orchid and yellow to purple, blue and red. At least 75 per cent of these should resemble the striking variegated types shown in the color plate.

Strong stems result from the healthy, compact plants so that the blooms are good cut-flower material as well as garden decoration. Treat your garden to a planting of this aristocratic strain.

Regular Size Plants, 80 cts. per 100, \$6.00 per 1000; 5000 or more, \$5.25 per 1000
Large Plants, \$1.20 per 100, \$9.75 per 1000

Not less than 50 of a size at the 100 rate; 250 at the 1000 rate

The HOME of the PANSY

PITZONKA'S PANSY FARM
BRISTOL PENNA.

DID you see the Pansies at the New York World's Fair this year—fine healthy plants covered with large flowers in five of the loveliest colors the Pansy is capable of producing? And did you notice what a long blooming season they furnished? Well, they were Pitzonka's Pansies, 400,000 of them, and four hundred thousand Pansies is a lot of Pansies, quite an order to place with one firm.

We received this flattering order because we have for years been building up a reputation for the very finest Pansy plants obtainable anywhere.

The park authorities placed their Pansy order with a Pansy Specialist with a reputation, and from all reports the Pitzonka Pansies at the World's Fair were an unqualified success.

Planting Pansies among Tulips, as was done at the World's Fair, furnishes color in the Tulip beds before and after the Tulips bloom.

New Pansy, Copper Lustre

We do not have the history of this lovely Pansy which came to us from Europe, but it is undoubtedly a Masterpiece seedling as it has the lovely ruffled form and velvety, heavy textured petals of the true Masterpiece type.

The color of the large blotch which covers all but the edges of the three petals is the darkest of seal-brown, while the two upper petals and the edges of the lower ones is a distinct rich shade of brownish burgundy.

Of course it is fragrant, deliciously so, and the stems are long enough to cut so one can enjoy the blooms in the house as well as in the garden.

If you like dark Pansies you, too, will be delighted with the rich color, the velvety feel and look of the heavy petals, and the spicy fragrance of the flowers as well as the close-growing, hard-working plant.

We have but a limited supply of Copper Lustre this season so must ask an extra price for them.

**Fine Plants, \$1.50 for 25,
\$4.00 per 100**

COPPER LUSTRE

CORONATION GOLD

PANSIES • Recent Novelties and Named Varieties

RECENT NOVELTIES

From the multitude of varieties that are introduced each year by foreign and American growers we have selected eight that we believe are best adapted to general garden use.

BERNA. A Swiss Giant with large, well-formed flowers of fine texture in a striking velvety violet-blue, with dark centers.

CORONATION GOLD. This great Pansy won the coveted Award of Merit in the 1939 All-America Seed Selections. It is a shapely bloom, irregularly round, with the edges of the petals faintly wrinkled. Stems of good length and a spicy fragrance make it desirable for cutting. Vigorous, healthy plants hold the flowers erect.

GIANT LAVENDER. Pleasing shade of lavender with slight variation. Flowers of fine texture borne well above the foliage on strong, stiff stems.

GIANT RED. Same type as preceding, in shades of red.

MAPLE LEAF, VIOLET JEWEL. Maple Leaf type with the same heavy foliage and large flowers. Rich purple.

MRS. A. H. SCOTT. Few Pansies are more lovely than this selection from the Baby type. It rarely exceeds 4 inches in height, and having the compact, bushy growth of the bedding Violas is valuable for both border and rockery. Deep purple-violet flowers shade off in the top petals to a white edge suggesting a miniature Lord Beaconsfield.

SHAKESPEARE'S PANSIES. Simple, sweet little Pansies suitable for any location. Fine free-flowering plants and small, dainty flowers in shades of purple, white, yellow, and blue. An old-fashioned flower recently rediscovered.

SUPER MAPLE LEAF GIANTS. A distinct variety with thick foliage and flowers of heavy substance, 4 to 5 inches across. Stems are long enough to make it desirable for cut-flower purposes. A mixture of many colors and color combinations.

Prices of Novelties: 75 cts. for 25, \$2.00 per 100

NAMED VARIETIES FURNISHED IN SEPARATE COLORS

Frequently the gardener desires to use Pansy Plants to secure an immediate color scheme. They are especially desirable for edging hardy borders, for setting around a bed of tulips, for use in the rock-garden, or for outlining a cemetery lot or an individual grave. Pansies may be used in a multitude of ways, and these standard varieties will give you an opportunity to carry out many garden ideas. All of the plants are compact growers, yet the stems are not so short as to render the blooms useless for cutting. While the flowers are not quite so large as those of the mixed types, they will give a wonderful effect.

Alpenglow. Cardinal shades, with dark blotches.

Blue Boy. Clear and pure silvery lilac. A bed of this variety gives an effect of striking beauty.

Bronze. Peculiar shades in bronze.

Giant White. Pure white flowers somewhat larger than Snow Queen.

Golden Yellow. Rich yellow with large brown eye.

King of the Blacks. The nearest to black in Pansies.

Lake of Thun. True splendid ultramarine-blue. The most beautiful of all blue Pansies. An exact duplicate of the Emperor William with much larger flowers. Excellent when used with Yellow Master.

Lord Beaconsfield. Deep purple-violet shading off in the top petals to a white line. Fine for graves.

Royal. Deep purple; very pretty.

Yellow Master. A pure golden yellow, like Golden Queen, but the flowers are somewhat larger and of better form.

Regular Size Plants, \$1.00 per 100, \$8.00 per 1000

Large Plants, \$1.40 per 100, \$12.00 per 1000

We do not supply less than 50 plants of any one color. 50 plants at the 100 rate; 250 at the 1000 rate

For the conservatives, those who prefer solid colors to the variegations of our Giant-flowering Mixture.

In selecting plants for seed for this Mixture, a definite proportion of each color is taken. These plants must be robustly compact so that the flowers can be cut if wanted, and the flowers must conform in size and shape, as well as markings, to an ideal.

The mixture should average better than 75 per cent of rich shades of red and pink, yellow and bronze, blue, black and lavender with plenty of the popular orchid tints.

Regular Size Plants, \$1.40 per 100, \$10.00 per 1000; 5000 or more, \$9.00 per 1000

Large Plants, \$2.00 per 100, \$15.00 per 1000

Not less than 50 of a size at the 100 rate; 250 at the 1000 rate

PITZONKA'S Cut-Flower Mixture

All Pansies are nice to cut but here is a strain especially for cutting. Each Spring the head of the house goes through our fields of Swiss Giant Pansies and selects the seed plants for this mixture.

The plants must be compact and upright, so the flowers will remain off the ground; the stems must be strong and at least 6 inches long; the blooms must be heavy textured so they will last; and there must be fragrance to please the nose as well as the eye.

He insists that 50 per cent of the flowers be in shades of red, with various variegated colors making up the remainder, and as yellow Pansies are poor cut-flowers there will be a dearth of yellows in the mixture. We believe you will be pleased with these Pansies.

Regular Size Plants, \$1.40 per 100, \$10.00 per 1000 Large Plants, \$2.00 per 100, \$15.00 per 1000

PANSY SEED

Those gardeners—professional or amateur—who wish to grow their own plants should be sure that the seed is the best obtainable. It must be properly matured and harvested; it must be fresh; it must be strictly true to variety name. Pitzonka's Pansy Seed fills all these demands. The seed-stock plants are grown in our own fields by experienced men; at the proper time the seed is harvested, cleaned, and stored under conditions that insure a high percentage of germination. And, of course, the seed is absolutely true to variety—our methods insure that point. For description of varieties, see pages 2 and 3.

English Daisies

BELLIS PERENNIS

Especially adapted for bedding, for edging borders and pools, and extremely desirable for giving touches of color to the rock-garden in early Spring. In moist, shady places they will continue to bloom well into the Summer. The plants should be mulched lightly in sections of the country where the ground freezes. Cultural directions same as for pansies.

Longfellow. Rose color. Free blooming, but the flowers are smaller than those of the Monstrosa strain.

Monstrosa. Surpasses all others in vigorous growth and extra-long stems. Large double flowers. We offer Monstrosa **Dark Rose**, **Rose**, **White** and **Mixed Colors**.

Monstrosa tubulosa, Etna. Quilled flowers which are slightly smaller than the other Monstrosa varieties. The color is a beautiful dark red.

Plants, 80 cts. per 100, \$6.00 per 1000

Monstrosa, Crimson. New. Very large; crimson. Plants, \$1.00 per 100.

Crispa, Cherry. A compact, button type producing bright cherry-red flowers $\frac{1}{2}$ to $\frac{3}{4}$ inch in diameter on 6-inch stems. A very profuse bloomer. Plants, \$1.00 per 100.

*Not less than 50 plants at 100 rate
250 at 1000 rate*

Forget-Me-Not

MYOSOTIS

One of the old familiar garden plants adapted for bedding or for edgings in connection with pansies and Spring-flowering bulbs. In early Spring they are covered with dainty little flowers. Myosotis is a biennial, so plants set this Fall will bloom next Spring. It is advisable to give the plants slight protection during the Winter.

Alpestris, Victoria. Clusters of dainty, azure-blue flowers. Plant bushy in habit. 6 in.

Alpestris, Victoria, Indigo Blue. Similar in form to the preceding but the flowers are deeper blue.

Alpestris, Victoria, Rose.

Blue Basket. Novelty. A new introduction that is very desirable for bedding. Compact, low-growing plants producing flowers of a beautiful deep blue. \$1.50 per 100.

Robusta grandiflora. Clusters of clear blue flowers on stems about 10 inches long. The plants are extra-strong growers.

**Plants, except where noted, \$1.00 per 100,
\$7.50 per 1000**

**AN ORDER MUST AMOUNT TO
\$2.00 OR MORE**

VIOLAS...Tufted Pansies

All varieties in this list are adapted for bedding purposes, and are almost indispensable for Spring gardening. Various colors can be selected to work out extremely interesting color schemes. If the plants are set in the early Fall so they may be established before freezing weather, they will give an abundance of flowers in the early Spring. If dead blossoms are removed regularly, new flowers will appear and the plants will continue to bloom throughout the Summer. If the plants become too tall during the Summer months, they may be cut back and allowed to produce new foliage. Violas are perfectly hardy and may be given the same treatment as pansies.

Recent Viola Novelties

ARKWRIGHT RUBY. Large-flowering type. Color a beautiful bright rosy crimson, with terra-cotta shadings, making it an outstanding variety. It has the added attraction of being very fragrant. A most desirable addition.

CHANTREYLAND. After careful observation we decided to offer Chantreyland instead of Apricot Queen. It is a more decided apricot, a heavier grower, flowers are larger, and stems longer.

FLORARIENSIS. An alpine prize developed by Monsieur Correvon. Mottled blue and white flowers in profusion appear in April and continue through the Summer. Fine for the rockery.

YELLOW GEM. Another large-flowered, deep pure yellow. Plants robust and very free.

KING HENRY. Compact, very free flowering plants with purple flowers having a lighter shaded center. Quite distinct.

Admiration

Arkwright Ruby

Chantreyland

Small-Flowering Varieties

BOSNIACA. Deep pink. Dwarf; free flowering. Excellent for rockeries and edgings as it blooms the entire season. Thrives best in a sunny place.

BOWLES' BLACK. An interesting novelty that makes a fine bedder. Upright plants are literally covered with small purple-black flowers with a tiny eye of gold. Blooms the entire season.

JACKANAPES. This is aptly named as its numerous saucy flowers suggest a gay party of pert little imps. The two upper petals are dark mahogany while the three lower ones are bright golden yellow. A continuous bloomer with long, strong stems, it furnishes rare cut-flowers from Spring to Autumn.

JOHNNY-JUMP-UP. The old popular favorite with its small Pansy faces in variable combinations of purple, blue, and yellow. Gives a colorful show during the Summer.

Plants, \$2.00 per 100
*Not less than 10 plants of any one of the
above Novelties*

Violas You Should Grow

Admiration. Deep violet. Well named because of its beauty.

Blue Perfection. Light blue with yellow eye. A very free-flowering variety.

Lutea Splendens. Rich golden yellow. Lovely when used with the blue varieties.

White Perfection. Clear white. One of the most desirable sorts.

Mixed Varieties. For this mixture we grow many different varieties, so there may be a wide range of color. A hundred plants will make a gorgeous showing.

Plants, \$1.00 per 100, \$7.50 per 1000
*Not less than 25 plants will be furnished
in any one color*

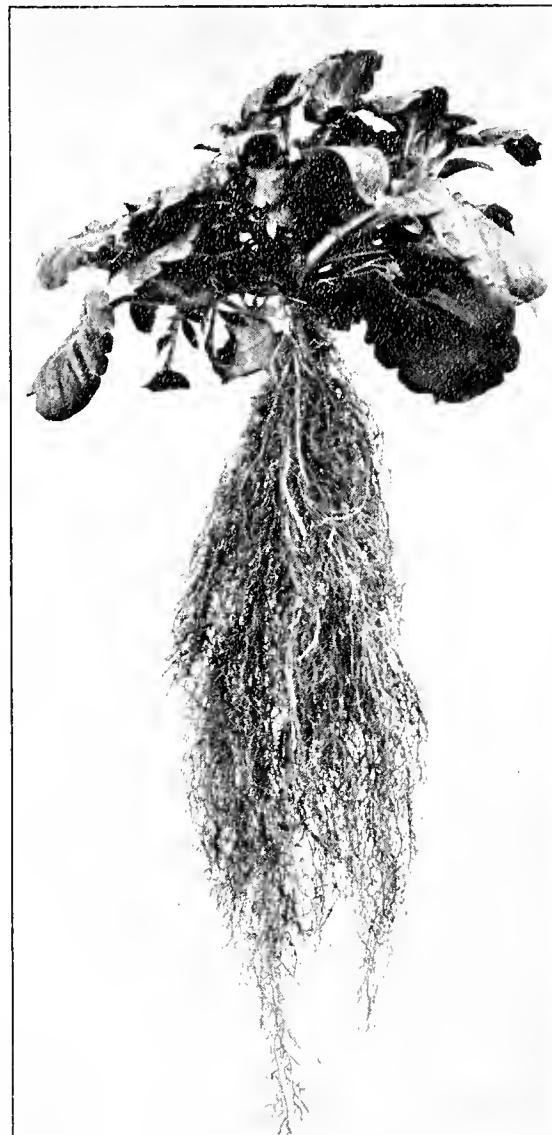

Blue Perfection

SIMPLE . . . SUGGESTIONS For Growing Pansies

We specialize in Pansy Plants and in Pansy Seed, and have had many years' experience in growing plants and in selecting strains and varieties. Naturally, we have learned many things about Pansies and are convinced that anyone can succeed in Pansy culture, provided the soil is in good condition and certain simple rules are obeyed. Here is some information that we know will be helpful.

1. Select a sunny location, but if possible a place that will receive some shade in the afternoon. Good garden soil will be satisfactory, provided drainage can be furnished; if drainage is lacking, raise the bed about 4 inches above the surrounding soil, adding a considerable amount of sand and plenty of humus.
2. Cover the entire bed with 1 inch or more of well-rotted stable manure if it can be obtained. If you cannot secure stable manure, use pulverized sheep- or cow-manure. This covering should be turned under to a depth of 6 to 8 inches, letting it stand for several weeks and dug back just before setting the plants.
3. If the soil on the bed is dry it should be soaked thoroughly and allowed to dry off until it is not sticky; then pulverize it to a depth of about 6 inches, firm it, and set the plants not less than 4 inches apart—a greater distance if you have the space. They should be set only as deep as they were in the nursery, and the crown should not be covered. Water the bed after planting and give shade during the middle of the day until the plants are well rooted.
4. After the plants have become well established, at intervals of 6 to 8 weeks, give an application of pulverized sheep- or cow-manure, or commercial fertilizer, which must be used strictly according to directions. Pansies are heavy feeders and in order to have large and richly colored flowers the soil must be very rich.
5. After the ground is frozen hard, a light mulch of hay or straw will be required. Do not cover the bed so heavily that the plants cannot be seen, or they will be smothered. In our nursery we find that about the middle of December is the proper time to cover the plants.

LARGE SIZE

REGULAR SIZE

Please study these two pictures. Both are much reduced from natural size, but they do tell a real story of Pitzonka's Pansy Plants.

The first picture shows the type, foliage, and the root-growth of our Large Pansy Plants. These Large Plants are a little older than the Regulars, are larger and better developed, and therefore bloom quicker and give large flowers from the start. The Large Plants are recommended for greenhouse Winter blooming.

One of Pitzonka's Regular Size Pansy Plants is pictured in the second illustration. These are younger plants, but are grown under exactly the same conditions and culture as the Large Plants. They will be a little longer in developing but will give just as fine flowers when fully grown. All they need is a little more time.

While Pansy Plants and Pansy Seed are important parts of our service to gardeners, we have other things that you may need. We invite you to send for

Our New Catalog of Hardy Plants

which presents novelties and old familiar plants that the well-planned garden demands.

When to Plant Pansy Plants

New England States and Great Lakes Regions, late September and early October.

Middle Atlantic States, all of October and early November.

Gulf States, all of November and early December.

Our season for shipping Pansy, Viola, Bellis, and Myosotis plants is from September 1 to May 1. Seeds are available at any season of the year.

Directions to Customers

ORDERING

We aim to execute orders as soon as received, but in the rush season slight delays are unavoidable, and when such is the case an acknowledgment will be sent at once. If you order early and give a shipping date, we will be pleased to ship so that the orders reach their destination on or about the date specified. When no shipping instructions are given, orders are filled in the rotation in which they are received.

TERMS

Those desiring to open accounts will please furnish references from three parties with whom they have had credit relations and allow sufficient time for us to investigate; otherwise cash must accompany order.

Remittances should be made by Post Office Money Orders, Drafts on New York or Philadelphia banks, or Express Money Orders, in amount sufficient to cover the complete order. Where it is impossible to obtain these, the letter should be registered. We cannot guarantee receipt of money sent in any other way. We reserve the right to decline C.O.D. orders.

No charge is made for boxes or packing, *except on shipments sent Parcel Post prepaid*, and the additional cost for packing, and postage on these is covered by the additional 10, 15, and 20 per cent as per table of rates.

In filling out your order, always give shipping directions, and write *Name and Address distinctly* on each and every order.

SHIPPING

It is customary for our patrons to receive their orders from us in perfect condition. However, there are times when plants arrive slightly withered. When that happens, place only the roots in water, in order to revive them. Never set out a withered plant.

Claims for shortage, etc., must be made within five (5) days after receipt of goods.

HOW WE SHIP

All orders are forwarded by Express or Parcel Post, purchaser paying charges. For those of our customers who wish their orders sent by Parcel Post, prepaid, additional charges must be added for special packing and postage. Rates as per states are listed hereon.

Dependable Popular Perennial Plants

FOR COMPLETE LIST OF PERENNIAL PLANTS, ASK FOR OUR COMPLETE CATALOG

HEMEROCALLIS DAY-LILY

The modern Day-Lily is one of the most satisfactory garden plants obtainable. They thrive in most any kind of soil, are not bothered by bugs or disease, and a mature plant will open flower after flower, day after day, from a number of stems, over a long period. By selection of varieties one can now have them blooming from early Spring, all through Summer and way into the Fall, in all the shades of yellow and orange. Plant a row of them or place in clumps in the perennial border.

Apricot. Deep orange flowers in early Spring. Medium height. 30 cts. each.

Aurantiaca. Large, trumpet-shaped, pleasing neutral orange blooms, with stamens and reverse of petals bright Indian yellow; sweet scented. June, July. 3 to 4 ft. 30 cts. each.

Bay State. (Betscher.) Brilliant, glistening deep yellow, the petals having a distinctive wavy edge. One of the heaviest and most persistent bloomers. Midsummer. 40 cts. each.

Dr. Regel. Handsome, rich orange-yellow flowers in early May and June; very fragrant. Fine for cutting. 1½ ft. 30 cts. each.

Flava (Lemon Lily). Sweet-scented, full, clear yellow flowers in June. 2½ ft. 30 cts. each.

Florham. Large, trumpet-shaped, rich golden yellow flowers, with Indian yellow markings. A strong grower. June, July. 3 to 3½ ft. 30 cts. each.

George Yeld. Large, open flowers nearly 6 inches across, with outer petals rich orange and inner ones flushed orange-scarlet. 3½ ft. July, August. 50 cts. each.

Goldeni. (Betscher.) Well named. The many fine deep golden orange flowers are produced freely in early July. Vigorous in habit and a most effective garden variety. 3 ft. 50 cts. each.

Gypsy. (Betscher.) Brilliant deep orange flowers on 3-foot, slender stems. A showy plant for the small border. July, August. 40 cts. each.

J. A. Crawford. (Betscher.) One of the finest Day-Lilies. Flowers of fine size, a combination of apricot and yellow—a unique tone. July, August. 3 ft. 40 cts. each.

J. R. Mann. (Betscher.) Glistening, large, open flowers of frosted apricot and yellow. One of the handsomest of Betscher's hybrids. July, August. 3½ ft. 50 cts. each.

Kwanso. Large, double flowers of a rich golden bronze during July and August. 30 cts. each.

Mandarin. Clear lemon-yellow, with greenish cast in the heart of each blossom. Very tall, wide-open, recurved type of flower. August. 75 cts. each.

Mrs. W. H. Wyman. (Betscher.) Lovely pale lemon-yellow flowers on 4-foot stems in August. Blends nicely with blue-flowering perennials. 50 cts. each.

Ophir. Golden, waxy yellow flowers 5 inches across, 6 inches long, stems 4 to 5 feet high. Early July to late August. 75 cts. each.

Thunbergi. Pale yellow blooms on stems 2 to 3 feet tall. July. 30 cts. each.

Winsome. The medium-sized flowers, which open soft orange and age clear lemon-yellow, are produced in great abundance. Early. 3 ft. 40 cts. each.

Collection of Hemerocallis:

Bay State, Flava, George Yeld, Goldeni,
J. R. Mann, Mrs. W. H. Wyman, Ophir

One each of these \$4.00
seven varieties

ALYSSUM saxatile citrinum. A mass of sulphur-yellow flowers and hoary gray leaves in May. 15 in. 75 cts. for 3, \$2.00 for 10.

Saxatile compactum. Indispensable for rockery or border, growing 1 foot high and producing masses of broad, flat heads of bright yellow flowers in May. 75 cts. for 3, \$2.00 for 10.

AQUILEGIA, Mrs. Scott Elliott's Strain. Long-spurred variety made up of wonderful colors and color combinations. 75 cts. for 3, \$2.00 for 10.

ASTER, Harrington's Pink. New. The first true pink Hardy Aster. This variety produces, in September, an abundance of blooms of a soft clear rose-pink which holds its color well. Grows about 4 feet tall and creates a real sight far surpassing any of the other pink varieties in the garden. \$1.50 for 3, \$4.50 for 10.

Red Rover. Deep rosy red flowers with golden centers. Compact habit. 3 to 4 ft. September to frost. \$1.00 for 3, \$3.00 for 10.

Wonder of Staefa (Frikartii). A Swiss novelty, ever-blooming perennial. Clear azure-blue flowers about 3 inches in diameter. A continual bloomer from June until after heavy frosts in November. This variety is entirely distinct from other hardy Asters; it is a hybrid. 3 ft. \$1.50 for 3, \$4.50 for 10.

DELPHINIUM Belladonna, Cliveden Beauty. The freest and most continuous-blooming of all the Delphiniums. The clear turquoise-blue of its flowers is not equaled for delicacy and beauty. 60 cts. for 3, \$1.50 for 10.

Bellamousum Improved. This is a rich deep blue form of the above, having the same free-blooming and other good qualities. 60 cts. for 3, \$1.50 for 10.

Chinense, Blue Butterfly. A distinct and neat variety growing about 1 foot high, with fine, feathery foliage and freely producing large blossoms of rich ultramarine-blue. 60 cts. for 3, \$1.50 for 10.

Chinense alba. White form of above. 60 cts. for 3, \$1.50 for 10.

Giant Pacific Hybrids. A new strain of hybrid Delphinium. Has wiry, slender stems and a large percentage of the plants have proved decidedly resistant to mildew. Includes a magnificent range of clear colors as well as pastel shades. \$1.20 for 3, \$3.50 for 10.

DIANTHUS barbatus (Sweet William), Pink Beauty. This lovely salmon-rose Dianthus should be in every garden. 60 cts. for 3, \$1.50 for 10.

Barbatus, Scarlet Beauty. Intense, bright scarlet flowers. 60 cts. for 3, \$1.50 for 10.

Beatrix. Light salmon-pink, blooming from May to frost. 90 cts. for 3, \$2.50 for 10.

DICENTRA spectabilis (Bleeding-heart). An old-fashioned favorite. Its long racemes of graceful, heart-shaped pink flowers in May and June are always attractive. Perfectly at home in any part of the hardy border, and especially valuable for planting in the shade. 1 to 2 ft. \$1.00 for 3, \$3.00 for 10.

DORONICUM excelsum. Large, bright yellow, daisy-like flowers, and one of the most effective very early Spring-flowering perennials. It succeeds everywhere and is very attractive when planted in clumps. 2 ft. 90 cts. for 3, \$2.50 for 10.

GAILLARDIA, Goblin. Especially suitable for the rock-garden. The dwarf plants, 12 to 16 inches high, form broad bushes of close, compact habit. Bright yellow blooms with deep red zones. 90 cts. for 3, \$2.50 for 10..

Sun God. Pure golden yellow, absolutely free from markings of any kind, with a prominent golden yellow center. The gorgeous flowers, almost 4 inches across, are produced on rigid, wiry, clean-cut stems, often 2 feet or more in height. Flowers freely from late June and intermittently throughout the season. 90 cts. for 3, \$2.50 for 10.

Geum Collection:

Boris (single; vivid scarlet) One plant of each
Lady Stratheden (rich golden yellow)
Mrs. Bradshaw (double; fiery red)
Fire Opal (scarlet-orange)

\$1.00

GYPSOPHILA repens Bodgeri. A new variety that is valuable for both rock-garden and cut-flower purposes. Produces double white flowers which in three to four days turn to flesh-pink. It is an ever-bloomer, flowering from early Spring until late Fall. Flowers resemble those of Bristol Fairy. Grows 1 foot high. 90 cts. for 3, \$2.50 for 10.

Bristol Fairy. A wonderful introduction producing large panicles of double white flowers with individual blossoms larger than above, and the purest white. It also flowers continuously throughout the Summer. \$1.50 for 3, \$4.50 for 10.

IBERIS, Snowflake. A lovely variety growing 6 to 8 inches high and having exceptionally large, pure white flowers. May, June. 90 cts. for 3, \$2.50 for 10.

LAVANDULA vera, Munstead Variety. A dwarf, compact form of the fragrant English Lavender. Cannot be too highly recommended. 90 cts. for 3, \$2.50 for 10.

LOBELIA cardinalis (Cardinal Flower). Rich fiery cardinal flowers from early in August to late in September. Few plants are more effective at their season of bloom. 2½ ft. 75 cts. for 3, \$2.00 for 10.

PHLOX divaricata canadensis. One of our native species which is worthy of extensive planting, commencing to bloom early in April and continuing through May, with large, fragrant, lavender flowers on stems 10 inches high. 75 cts. for 3, \$2.00 for 10.

PHLOX decussata, Caroline Vandenberg. True lavender-blue with large individual flowers. 90 cts. for 3, \$2.50 for 10.

Daily Sketch. A splendid and worthwhile English novelty of salmon-pink with a vivid crimson eye. The flower-trusses are enormous and the individual florets extra large. 3 ft. \$1.00 for 3, \$3.00 for 10.

George Stipp. Deep, glowing salmon with shaded lighter eye. Very outstanding. 75 cts. for 3, \$2.00 for 10.

Leo Schlageter. Vigorous, healthy grower with large, pyramidal clusters of bright scarlet-carmine overlaid with orange. Very brilliant. \$1.00 for 3, \$3.00 for 10.

Mrs. Jenkins. Pure white, late flowering. 75 cts. for 3, \$2.00 for 10.

Salmon Glow. Lovely flame-pink with salmon shadings, softened with lilac and white tints at center, the effect as a whole being a rich salmon. Extremely free flowering and a strong grower improving with age. A very fine variety. \$1.00 for 3, \$3.00 for 10.

Tigress. Vigorous, upright grower, with immense trusses of brilliant orange-scarlet flowers. The trusses are huge pyramids which are built up by long-branched laterals, giving an unusually long period of bloom. \$1.00 for 3, \$3.00 for 10.

PHLOX subulata grandiflora rubra. A new variety to our locality. Promises to be the nicest of the bright crimson types. Large flowers and a very profuse bloomer. When in full bloom the foliage is entirely covered. \$1.00 for 3, \$3.00 for 10.

PHYSOSTEGIA, Rosy Spire. A new False Dragon-head with splendid spikes of rosy crimson flowers in September. It is much taller than its parent, Vivid, reaching 3 to 3½ feet, and furnishes lovely fall color for the border and fine flower-spikes for cutting. 90 cts. for 3, \$2.50 for 10.

PLATYCODON grandiflorum praecox giganteum. An extra-early flowering variety with magnificent blue flowers measuring as much as 4 inches across. The sturdy plants bloom profusely from August until frost. 2½ ft. 90 cts. for 3, \$2.50 for 10.

PYRETHRUM, Buckeye. An extra-large, double bloom with a tufted center of deep rose surrounded by outer petals of rich red. \$1.20 for 3, \$3.50 for 10.

Miami Queen. One of the largest. Semi-double; bright deep rose with a crested center of rich pink. \$1.20 for 3, \$3.50 for 10.

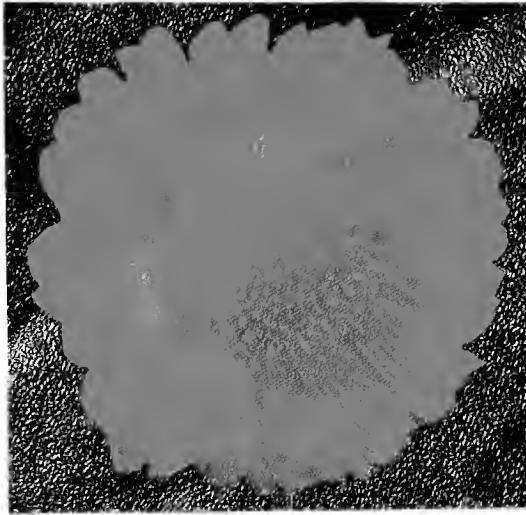

Victory. The fully double pure white flowers are freely produced on tall, stiff stems. Excellent for cutting and garden use. \$1.20 for 3, \$3.50 for 10.

SALVIA Pitcheri. One of the most admired plants during the fall months. Large rich gentian-blue flowers. 3 to 4 ft. 75 cts. for 3, \$2.00 for 10.

TROLLIUS Ledebouri, Golden Queen. Recent introduction of special merit. Acclaimed in both Europe and America as a choice item for the border with its extra-large golden orange flowers. Very highly recommended. \$1.00 for 3, \$3.00 for 10.

VERONICA, Blue Spire. Lovely deep blue spikes. The foliage is clean and plant is of bushy, upright habit, blooming throughout the early Summer and withstanding hot and dry weather without suffering. A very worth-while border plant, 2 feet high. \$1.00 for 3, \$3.00 for 10.
